Further to our preliminary advice, I am writing to confirm your participation in our launch event for the 2021, the virtual *Global Investor Roundtable* to be held on **Wednesday 3 February**.

The world is living through unprecedented times. The risks of insularity brought on by the continuing COVID-19 pandemic add further uncertainty to an already volatile and unstable global economy.

What can be done to ensure that global flows of investment and trade remain open and transparent, to mobilise global investor capital to better underpin future prosperity?

Does the pandemic present us with a rare opportunity for positive step-change? Can we make a useful contribution to global policymaking and collaboration, with Italy leading the G20 in 2021?

The Global Foundation is bringing together a select cross-section of outstanding contributors from the worlds of central banking, long-term investment and asset management, together with CEO's of global enterprises, for a frank<sup>1</sup> roundtable discussion that will assess options and avenues for co-operation in moving forward.

Leading speakers at the *Global Investor Roundtable* will include:
