

Global Alliance, Partners and Allies

Following the success of the [Carajás Roundtable](#), the Foundation's Global Project, '[Shaping Global Governance, Climate and Nature](#)', has evolved to become a Global Alliance.

Formally launched at the [Rome Roundtable](#) in 2024, it has rapidly gained momentum through a series of high-level engagements, including strategic roundtables convened in 2025 in the Amazon in Brazil and in Paris, as well as in Australia and online. It is supported by Key Partners, Vale and TotalEnergies, with global Allies including the United Nations, OECD, and WTO.

Each one of our Partners and Allies is leading with purpose in their respective fields and at the same time, contributing to the overall approach that we are shaping.

While each may not necessarily agree with others on all issues, they do share a common conviction, that there is value-added in working together with common purpose.

We describe this collaboration as an 'elastic band' approach — a flexible but cohesive force that helps to bond and enable a group of people of influence to move forward together and to generate positive and meaningful outcomes, on an ongoing basis.
